

DJ5GAS Engine Emissions Analyzer/ Recorder for the PC

Continuously Measures and Records HC, CO, CO2, O2, NOx, RPM & 5 Aux Data Inputs

Turns a PC into an Emissions Data Acquisition Platform

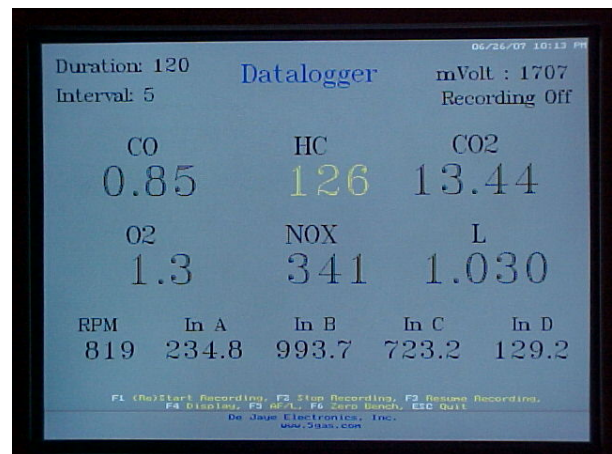

Extra mVolt Inputs for Temp, Flow, Pressure, CO ppm Data Modules

Programmable Data Logger with Over-Range Flags and Time & Date

Displays Live Real Time Data & Saves in Excel and Report Formats

Compact, Portable 12VDC
6.5 x 11 x 9 in. @ 10 lbs.

Flexible & Adaptable for Desk Tops, Laptops & SBC

Environmental Emissions Analyzers/Recorders

1627 East Madison Des Moines IA 50313 USA

DJGAS is a Non-Dispersive Infrared (NDIR) Emissions Monitor/Recorder for your PC. It CONTINUOUSLY measures and records NO_x, CO, CO₂, O₂, HC, RPM, Exhaust Temperature and Lambda. DJGAS is designed for Gas, CNG, LPG and Diesel testing and monitoring in stationary, remote, portable and lab applications. The Andros 6241A Gas Bench in the DJGAS has worldwide certification and a reputation for dependability and reliability in the field of Emissions Monitoring and Inspections.

The DJGAS software continuously monitors and records Emissions Data at a selectable interval of 1 to 999 seconds. Programmable limits can flag over range values on the screen and the printout. The test data is saved in both a report AND Excel ready format.

Additional inputs for optional data modules are available for Temperature, Flow Rate, Pressure, CO ppm, NO ppm, H₂S and VOC modules. The inputs can be adapted for Millivolt or 4 to 20 ma. Data from these optional modules is saved in the Excel file so it can be included with any Excel calculations. Test data is also available in a 4 to 20 ma output.

DJGAS is ideal for international applications. It operates on 12 or 24 VDC. The language file is removable so the text can be changed or translated into a different language.

DJGAS turns any PC into an Emissions Data Acquisition Platform for your Compliance Verification and Emissions Monitoring & Recording needs. Custom Software can be specially designed for your application.

Please contact us for a DJGAS demonstration CD.

Thank You,

Dave Peitzman
